

## CARBIDE TIPPED SNOW BLADES

### CARBIDE BLADES

- Eliminates costly changes over time
- Minimize hardware costs
- Reduce levels of inventory
- Straight edge at all times
- Usually supplied in sections to accommodate all moldboard sizes and ease of installation.

- Manufactured from hot rolled carbon steel bar.
- Tungsten carbide inserts are brazed in a groove suitably prepared in the metal blade, using electric induction heating and soldered on all sides to guarantee maximum bond and minimum wear.

TUNGSTEN CARBIDE  
INSERT DESIGNS  
AVAILABLE

- Tungsten carbide inserts are positioned flush with the leading edge of blade. This prevents premature cracking, chipping and breakage.
- Thickness 3/4" and 7/8".
- Width – 6".
- Lengths – available in various lengths and hole spacing to ACCOMODATE ALL OEM PLOW MANUFACTURERS.
- Hole sizes available to accommodate 1/2", 5/8" and 3/4" plow bolts.
- CARBIDE INSERT DESIGNS OPTIONAL  
(SPECIFY UPON ORDERING)
